

**On
Understanding
&
Appreciating
Astrology**

Our life is influenced by the Cosmos ...

❑ *What happens in*

❑ *the Universe*

❑ *the Galaxies*

❑ *our Solar system*

❑ *our planet*

affects our life immensely ...

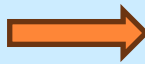

Periods of Moon affect ... human birth and life

- **Stars and constellations influence our behaviour, mood, and actions.**
 - **Earth also influences us too.**
- ✓ **Our predisposition is massively affected by the stars and earth.**
 - ✓ **Indeed, Astrology is seamlessly interrelated to our predisposition.**
- ❑ **Experience, formal education, training, and understanding could ride along our astrological moods.**
 - ❑ **Astrology Knowledge add values to our education.**
 - ❑ **Mothers should understand the mechanics of Astrology.**

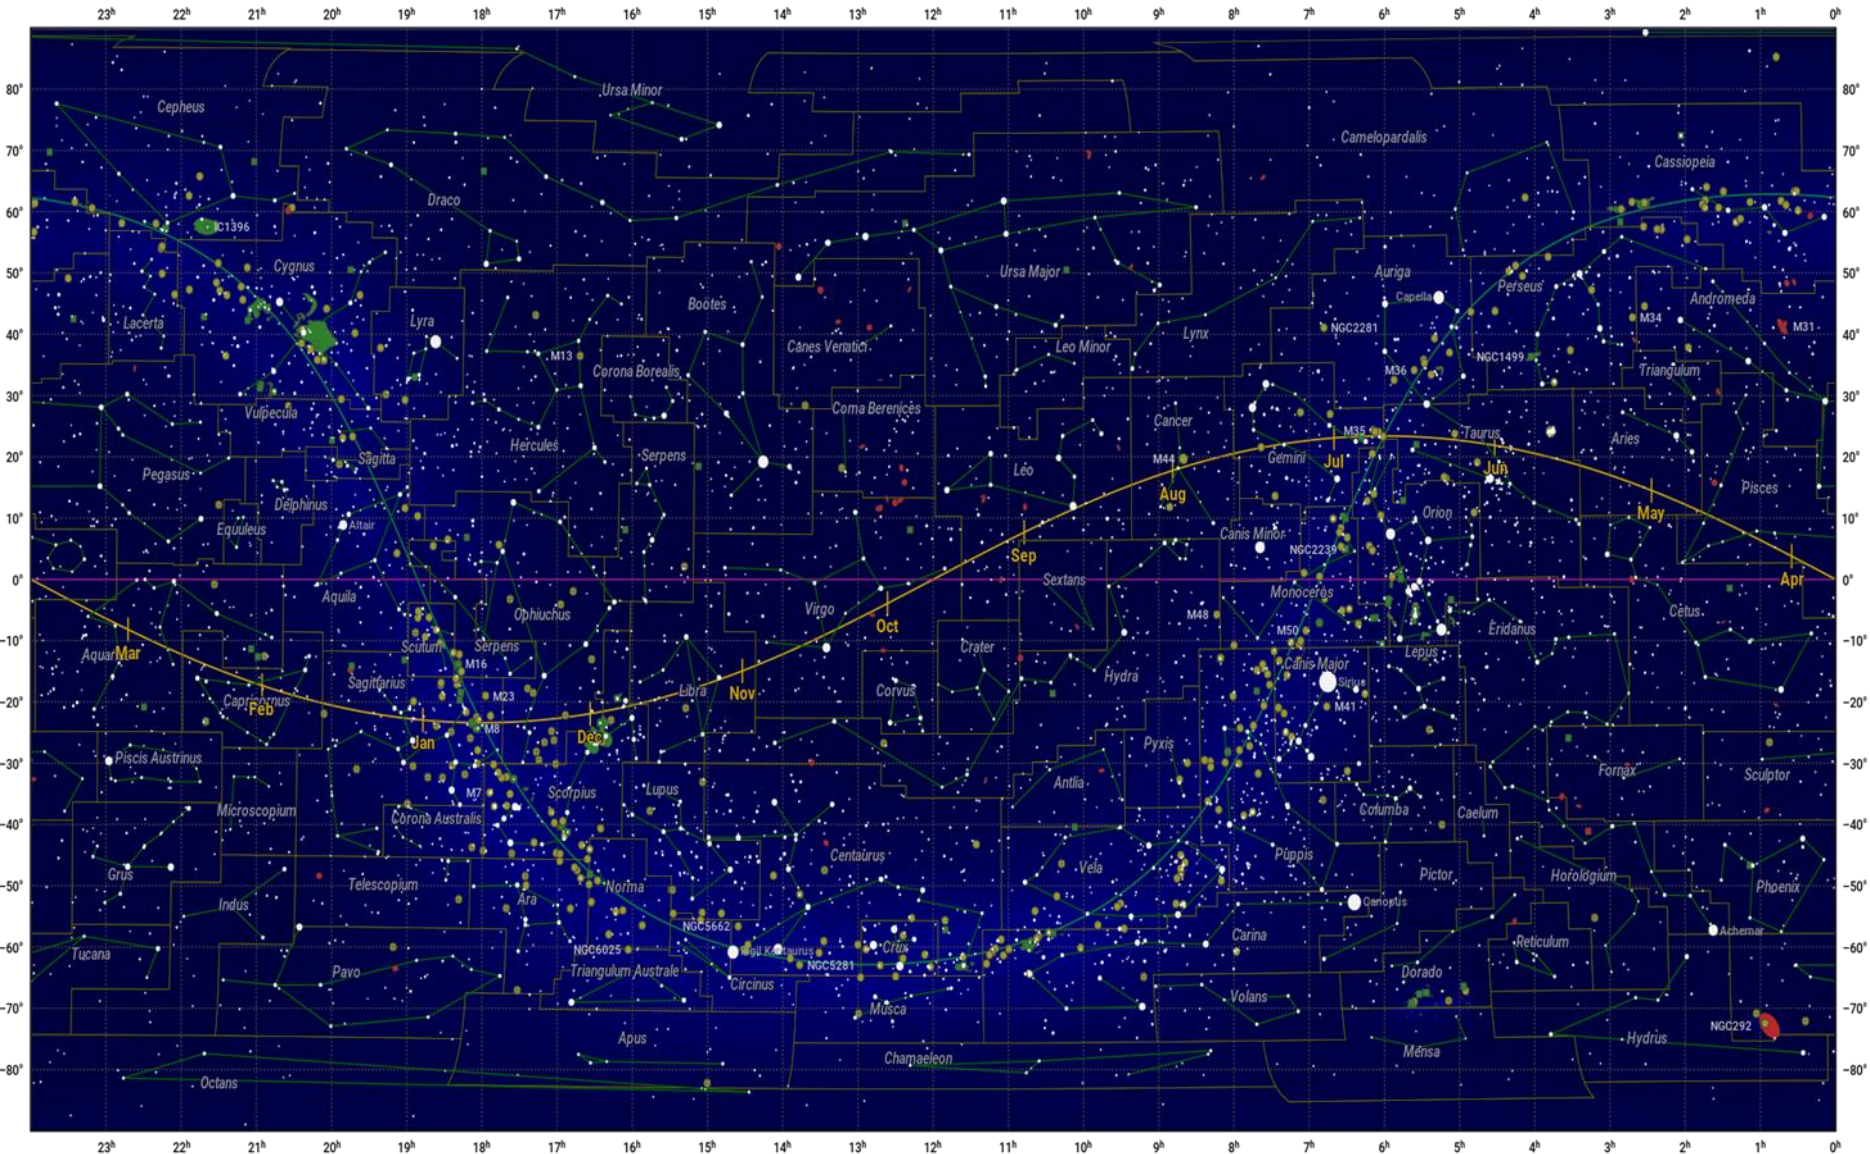

All great civilizations embraced Astrology

- Every civilization was and is related to the stars.
- Religions, philosophies, economic theories, even flags are linked to the stars.
- Sumerians, Babylonians, Assyrians, Israelites, Egyptians, Persians, Greeks, Indians, Chinese, Mayans, and other notable civilizations all cherished astrology.

Galaxies cyclicity and periodicity

THE MILKY WAY

NATIONAL GEOGRAPHIC

Home galaxy of Earth, the Milky Way is a great-shaped spiral of a few hundred billion stars, dusty regions of glowing hydrogen gas, and other celestial objects. It is a vast, swirling, shimmering, and colorful disk, 100,000 light-years across and 1,000 light-years thick. It is a great-shaped spiral of a few hundred billion stars, dusty regions of glowing hydrogen gas, and other celestial objects. It is a vast, swirling, shimmering, and colorful disk, 100,000 light-years across and 1,000 light-years thick.

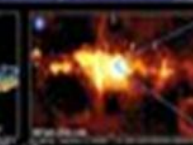

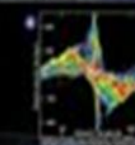

HOME TO THE EARTH

The Sun is a small, yellow dwarf star, one of billions of stars in the Milky Way. It is located about 25,000 light-years from the center of the galaxy. The Sun is a small, yellow dwarf star, one of billions of stars in the Milky Way. It is located about 25,000 light-years from the center of the galaxy.

THE CENTER OF THE MILKY WAY

The center of the Milky Way is a region of intense radiation and high energy. It is located at the very heart of the galaxy, where the spiral arms meet. The center of the Milky Way is a region of intense radiation and high energy. It is located at the very heart of the galaxy, where the spiral arms meet.

THE GALACTIC HUB

The Galactic Hub is a region of intense radiation and high energy. It is located at the very heart of the galaxy, where the spiral arms meet. The Galactic Hub is a region of intense radiation and high energy. It is located at the very heart of the galaxy, where the spiral arms meet.

The Panorama of Cosmos ... in Harmony

How the Cosmos appears ...

The Great Cycle through the Asterisms

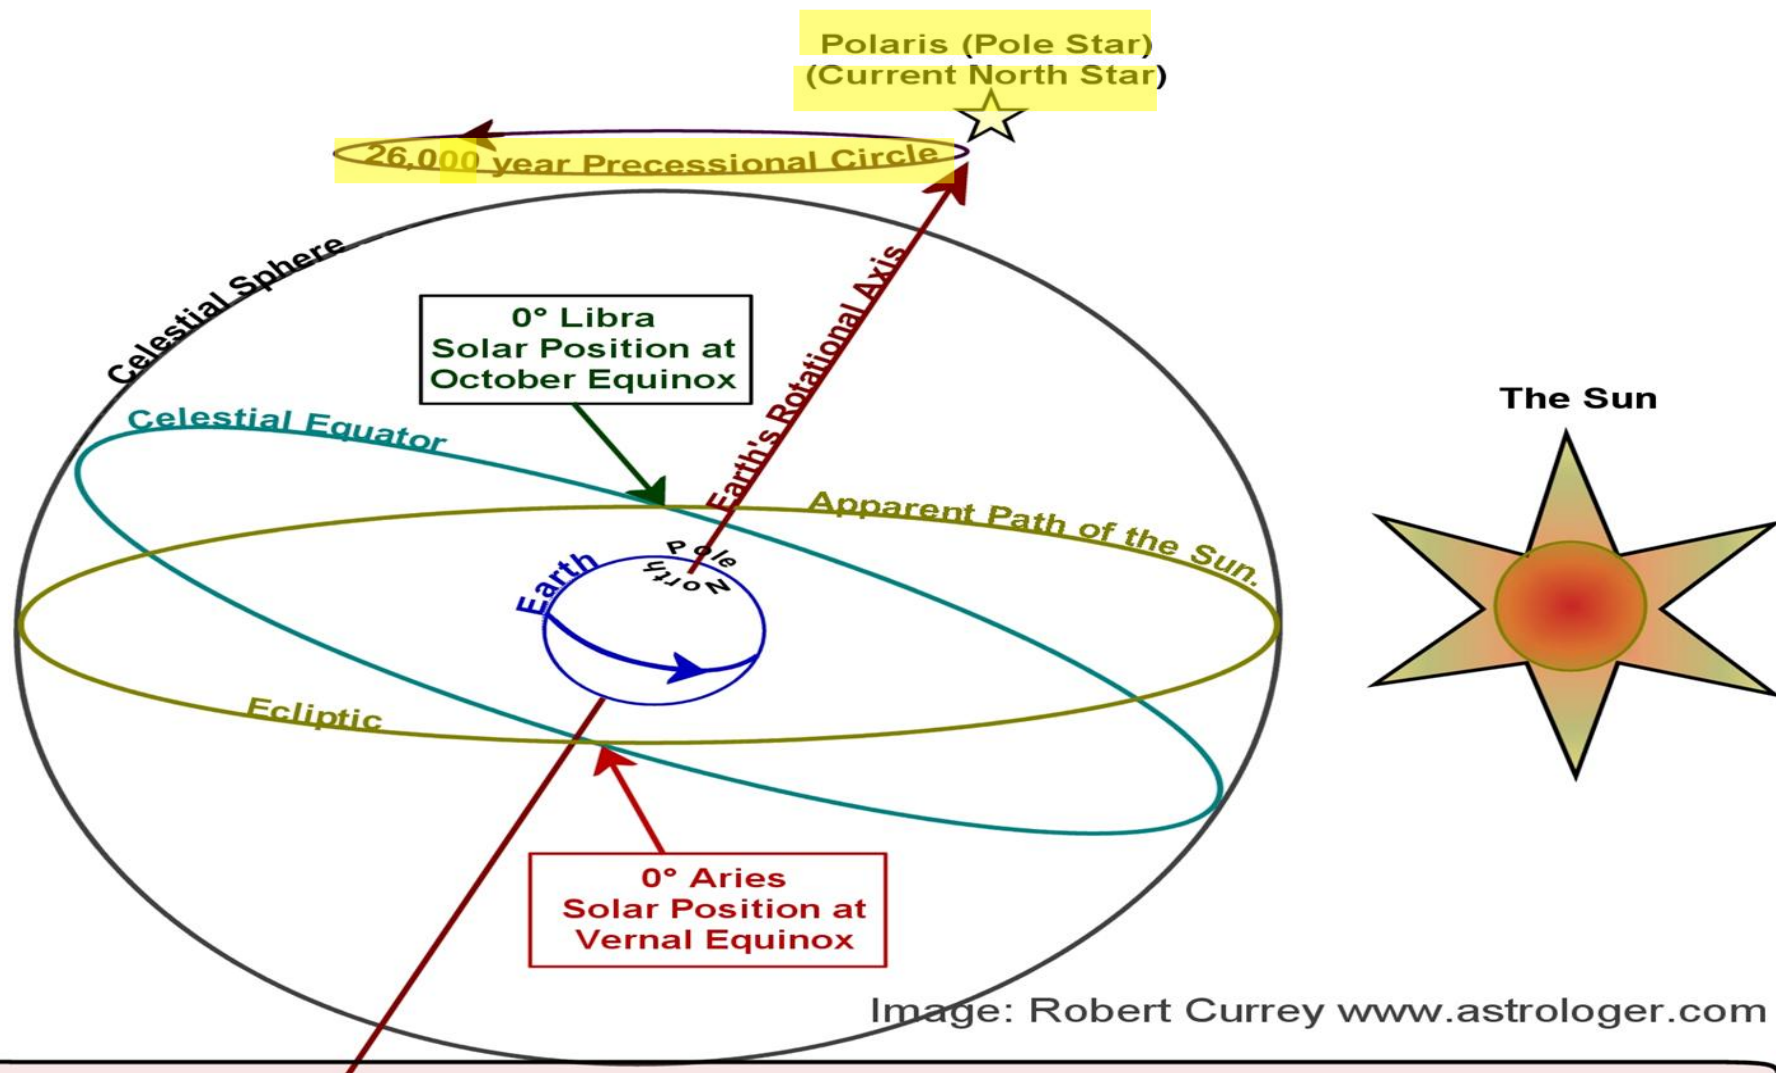

The Great Cycle ~ Annus Magnus

Μέγας Ενιαυτός ~ Ο Μέγας Κύκλος

- ❑ Annus Magnus is defined by the movement between two stars:
From Lyra (Vega) to Polaris (North Star)
and back) in 25,920 years (*or 26,000 years*).
- ❑ Earth axis starts by pointing to the North Star
(in Ursa Minor constellation) and
revolving to end up pointing to Vega Star
(in Lyra constellation)

The Great Cycle ~ Annus Magnus

The planets travel around ($>7^\circ$) the Ecliptic (the apparent path of the Sun), along which positions are measured in celestial latitude demarcated by the Tropical Zodiac. The Ecliptic Measuring System corresponds to the Earth's seasons & not with the distant fixed stars which precess relative to the Equinox.

From Lyra (Vega) to Polaris (NorthStar)

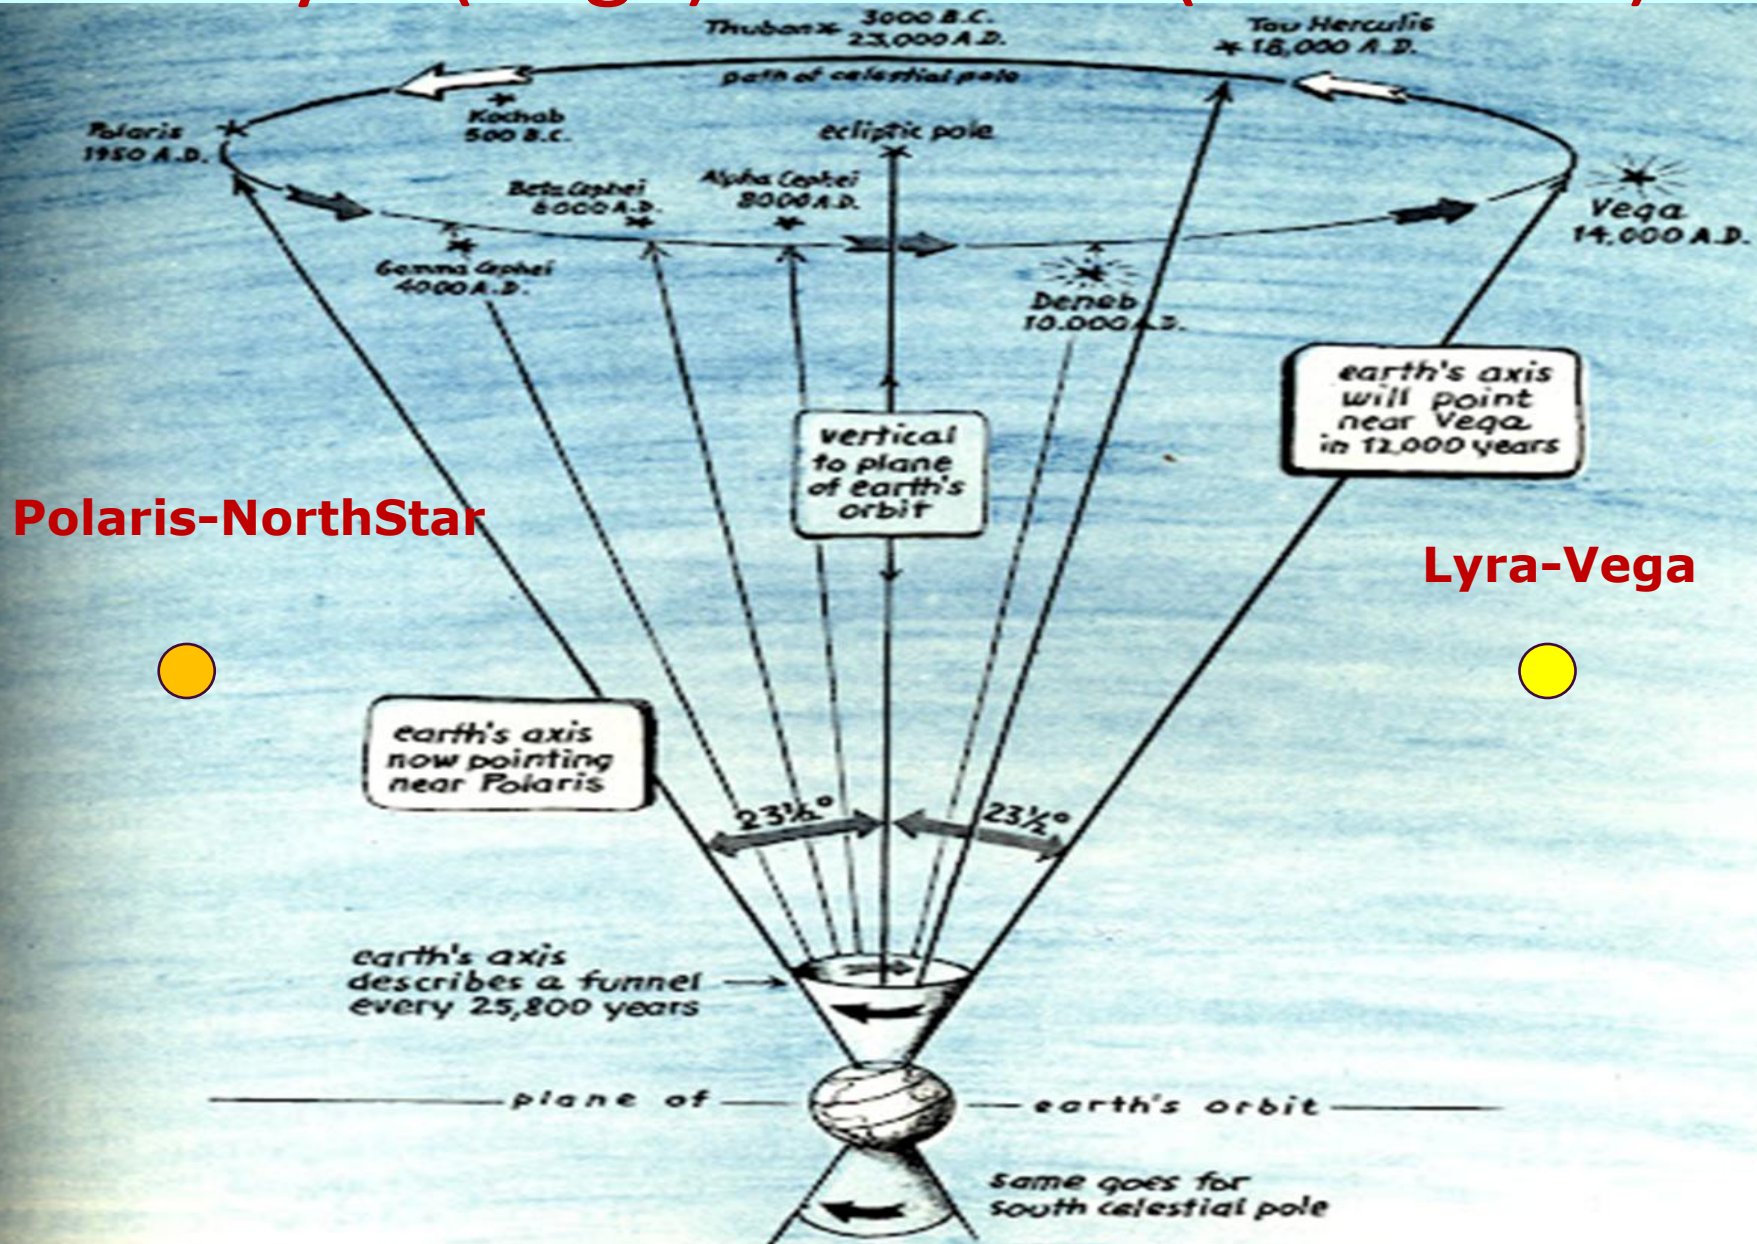

Figure 24: The Wobble of the Earth's Axis

Today the Equinox is approaching Aquarius

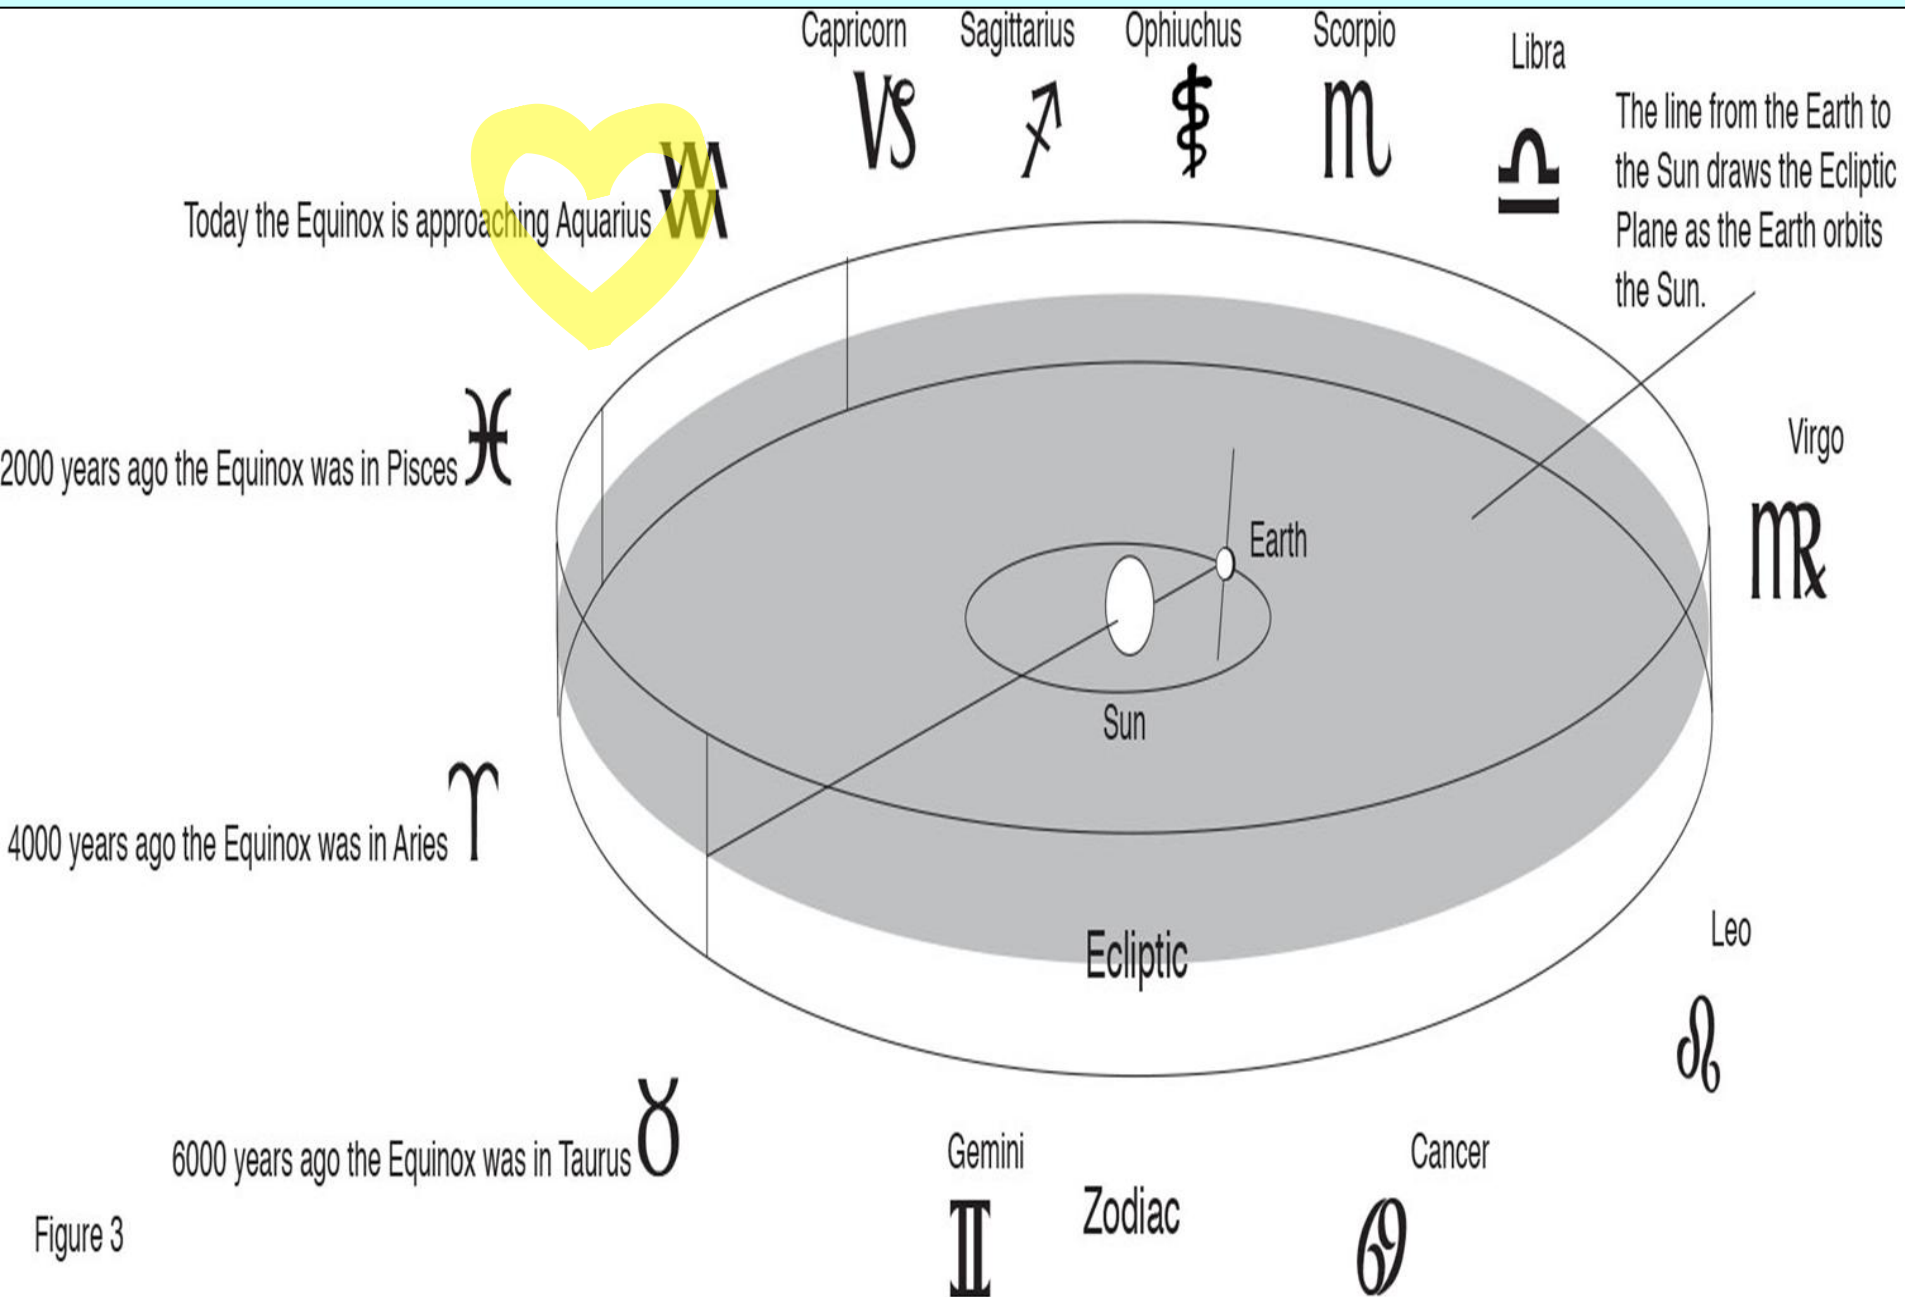

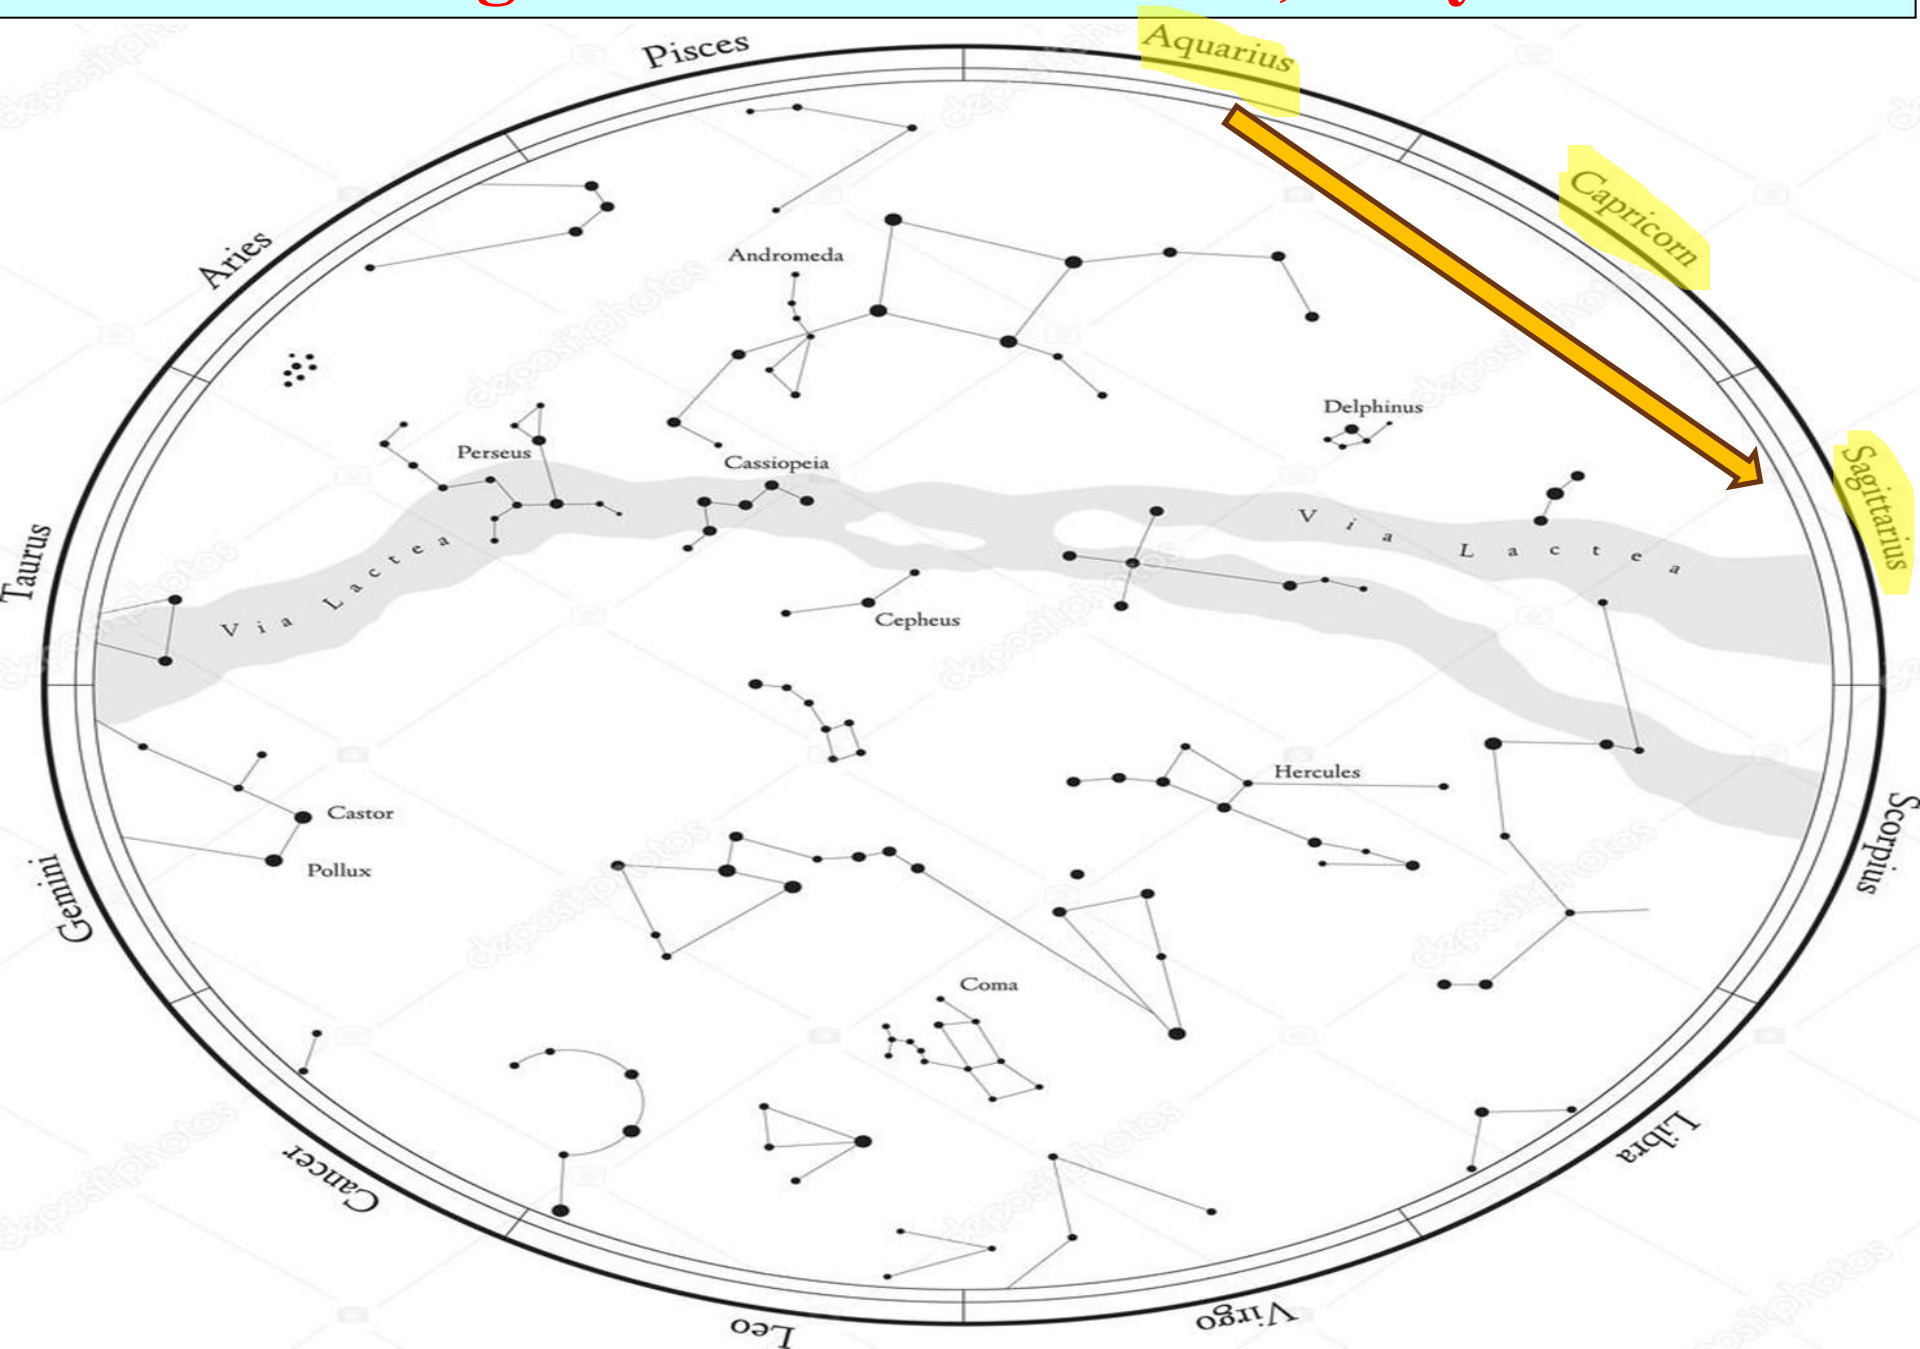

Figure 3

A detailed celestial map of the constellation Ophiuchus. The map shows the constellation's stars, including the bright star Rigel (β Ophiuchi) and the star Vega (α Ophiuchi). The constellation is depicted as a figure holding a staff with a serpent entwined around it. The map includes labels for neighboring constellations: Scorpius (SCORPIUS), Sagittarius (SAGITTARIUS), and Ophiuchus (OPHIUCHUS). The map also shows the ecliptic and the zodiac signs.

To Sagittarius in about ... 4,320 years

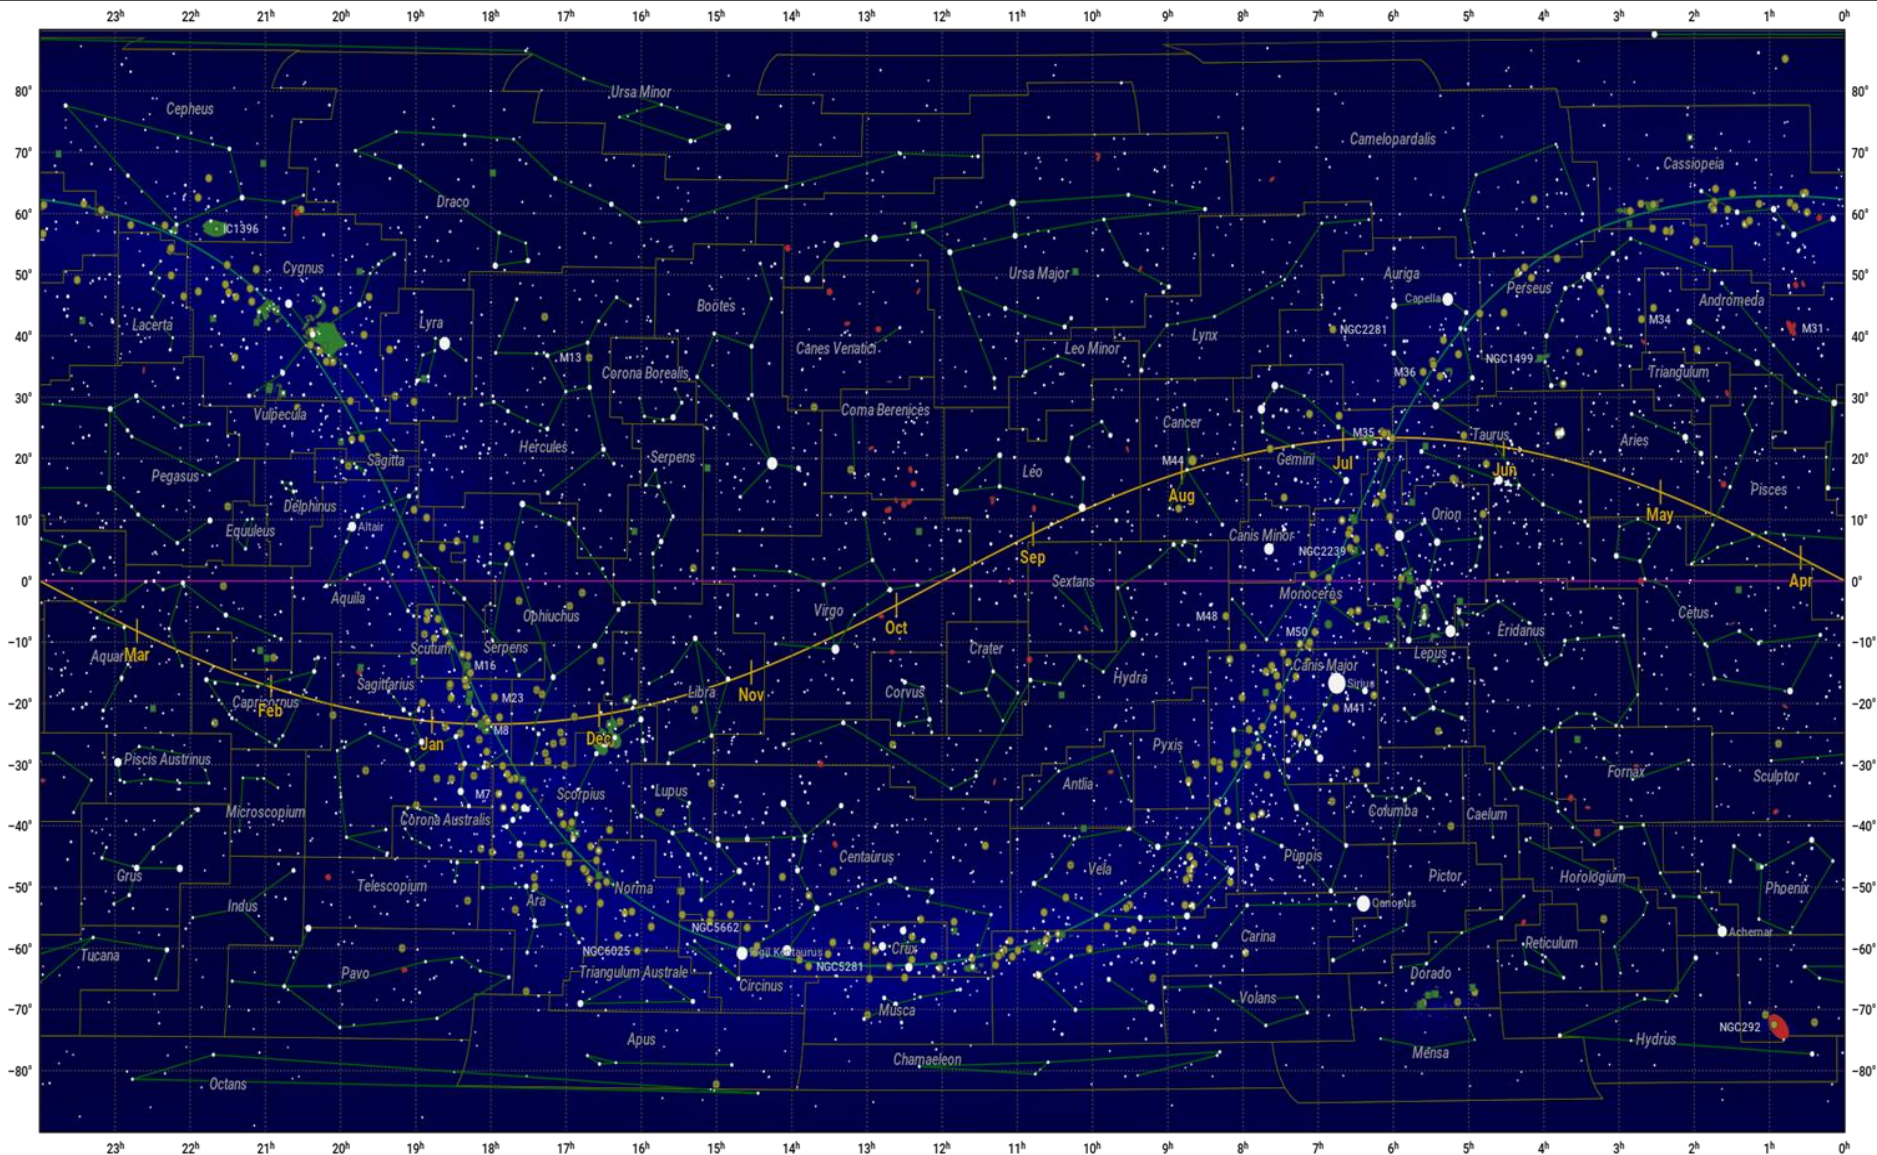

We should study the Universe ...

Scorpio	Pluto / Mars (lover)	Mars	Pluto	Moon
Sagittarius	Jupiter	Earth	Neptune's Node	Mercury/N Node
Capricorn	Saturn	Saturn	Mars	Jupiter
Aquarius	Uranus / Saturn	Jupiter	Mercury	Nothing...It would be the Sun but that's never had
Pisces	Neptune/Jupiter	Pluto	Venus	Mercury

For the purpose of determining the constellations in contact with the ecliptic, the constellation boundaries as defined by the International Astronomical Union in 1930 are used. For example, the Sun enters the IAU *boundary* of Aries on April 19. Needless to say, the IAU defined the constellation boundaries without consideration of astrological purposes.

The dates the Sun passes through the 13 astronomical constellations of the ecliptic are listed below, accurate to the year 2011. The dates will increment by one day every 70½ years, and already several have changed. The corresponding tropical and sidereal dates are given as well.

Constellation		Sidereal Date Cyril Fagan	Tropical date	IAU Definition Walter Berg ^[2]
♈	Aries	April 15 - May 15	March 21 - April 20	April 18 - May 13
♉	Taurus	May 16 - June 15	April 21 - May 20	May 13 - June 21
♊	Gemini	June 16 - July 15	May 21 - June 20	June 21 - July 20
♋	Cancer	July 16 - August 15	June 21 - July 21	July 20 - August 10
♌	Leo	August 16 - September 15	July 22 - August 22	August 10 - September 16
♍	Virgo	September 16 - October 15	August 23 - September 22	September 16 - October 30
♎	Libra	October 16 - November 15	September 23 - October 22	October 30 - November 23
♏	Scorpius	November 16 - December 15	October 23 - November 21	November 23 - November 29
♐	Ophiuchus	N/A		November 29 - December 17
♐	Sagittarius	December 16 - January 14	November 22 - December 21	December 17 - January 20

Astronomical Map of the Zodiac

9) Oriental – Chinese Astrology

The Effect of the Chinese Zodiac on National Birth Rates

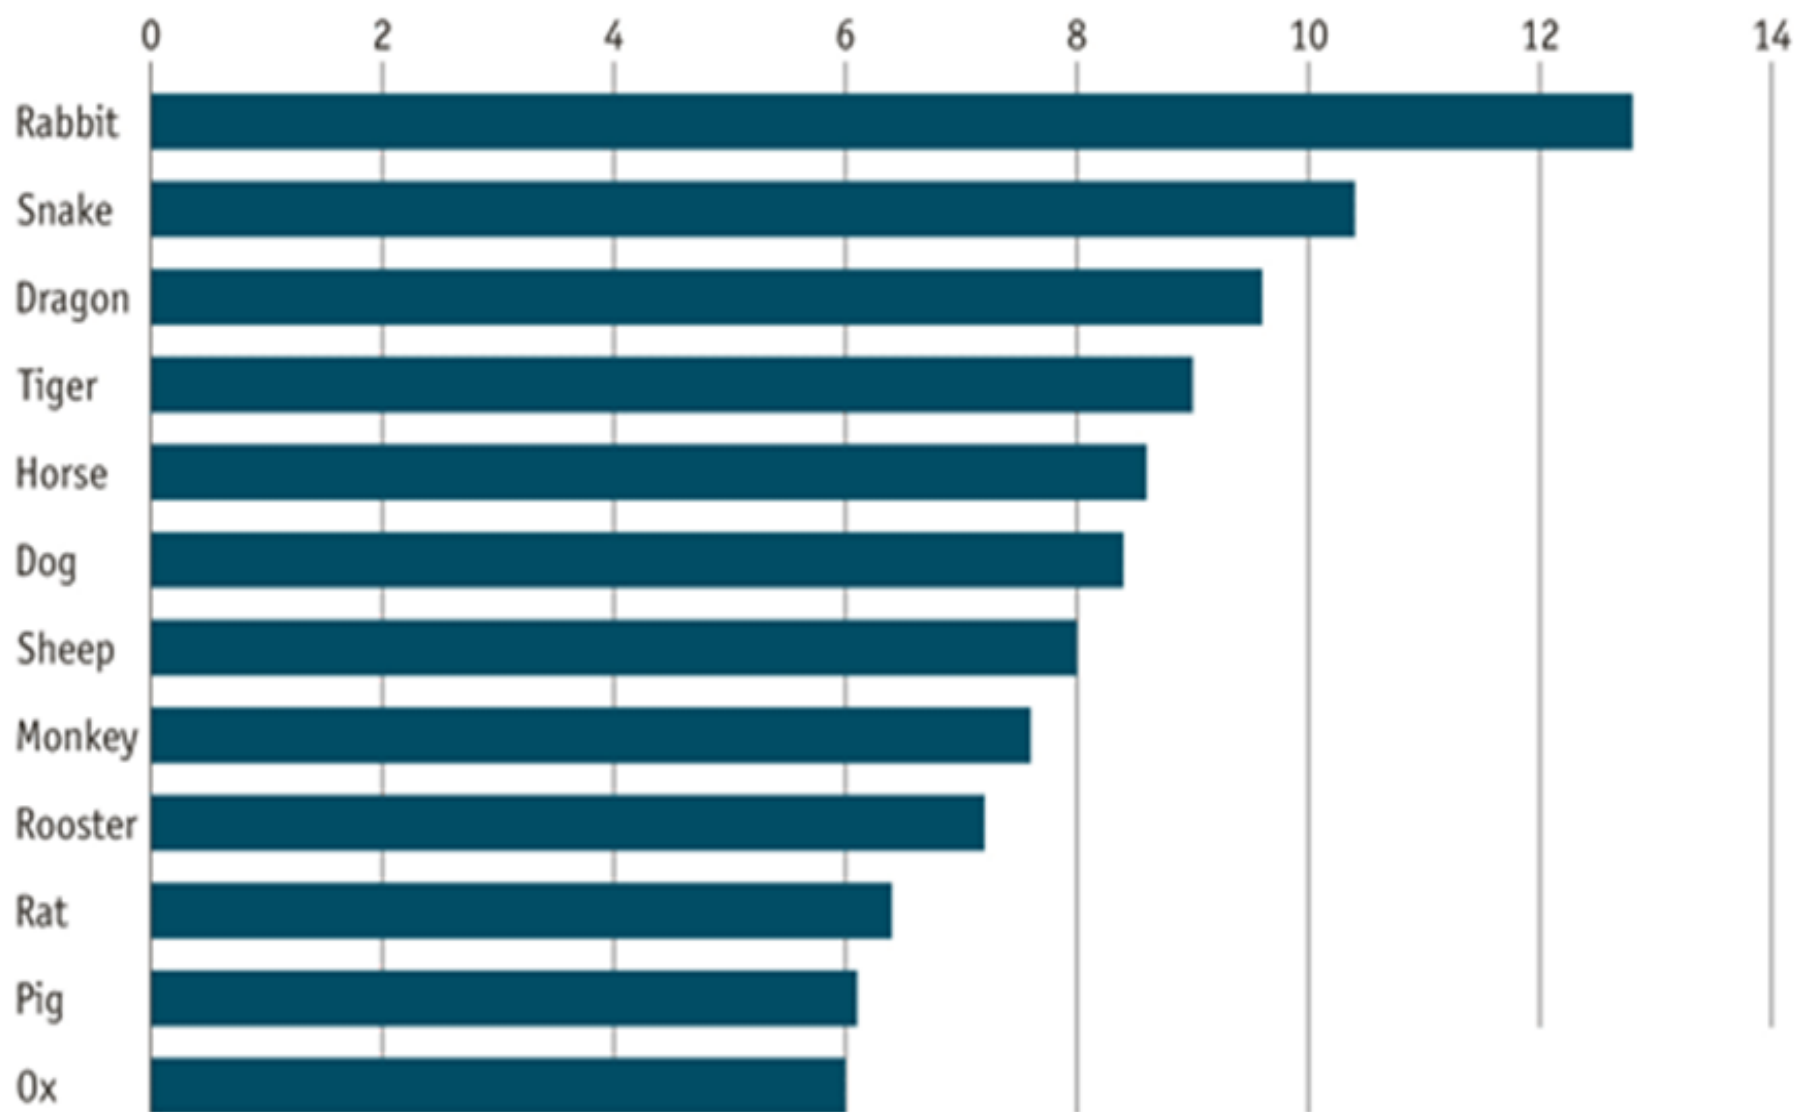

The total fertility rate of Taiwan, for the latest zodiac cycle on record. The curve is fit to data from 2002-2009.

Like many Chinese-speaking countries, the birth rate in Taiwan fluctuates on years considered astrologically exceptional. In 2010 Taiwan's birth rate fell to one of the lowest in the world: it was the Year of the Tiger, considered an undesirable sign in Taiwanese culture. The birth rate rebounded and then some in 2012, the Year of the Dragon, an exceptionally auspicious year for births.

China's 1,000 richest people by zodiac birth year

2012, % of total

10) Terminology

Words and concepts of Astrology

- Predictions (Astrological forecasts and predictions)
- Progressions
- Ptolemy (Claudius)
- Planetary Retrogradation
- Revolution (Lunar revolution)
- Revolution (Solar revolution)
- Rising/setting (of the planets)
- Science (The conflict between science and astrology)
- Seasons, Signs and Zodiac
- Septenary
- Signs of Zodiac
 - Aries
 - Taurus
 - Gemini
 - Cancer
 - Leo
 - Virgo
 - Libra
 - Scorpio
 - Sagittarius
 - Capricorn
 - Aquarius
 - Pisces
- Significators (astrological)
- Signs and symbols
- Status (Terrestrial – Celestial)
- Symbols
- Symbolism of Saturne
- Tarot
 - Arcana: The Fool (the Beggar)
 - Arcana 1: The Juggler
 - Arcana 2: The High Priestess
 - Arcana 3: The Empress
 - Arcana 4: The Emperor
 - Arcana 5: The Pope

Astrological forecasts and predictions

Both branches of astrology – judicial astrology and hourly astrology aim to make predictions or conjecture about the future

Hourly Astrology makes decisions depending on the position of the stars on a given future date, in a given place. It therefore presupposes that the time and date are known. The star chart drawn up for this time and place is an instrument of analysis and investigation.

Judicial Astrology is the study of the individual's star (through the birth chart). This analysis can generate a detailed description of the temperament and character of the person, as well as any complexes and inner conflicts. Having established this, different astrological techniques can be used to speculate about the future of the individual. There are 4 possibilities:

- Planetary transits
- Solar, Lunar, as well as Jupiterian and Saturnian revolutions
- Planetary directions
- Planetary progressions
 - **Secondary progressions** : based on the idea of a correspondence between the days and the years following the birth (1 day = 1 year)
 - **Symbolic progressions** : on the basis that 1 degree of the Zodiac is equal to 1 year.
- **Projections** are another system, used more specifically with the revolution techniques. This technique draws on the following symbolic equivalences:
 - **1 sign = 1 year** for Jupiterian or Saturnian revolutions; (the star is '*projected*' 1 sign (30°) per year).
 - **1 sign = 1 month** for solar revolutions;
 - **1 sign = 1 day** for lunar revolutions.

EXPLICATION TO ASTROLOGICAL CELESTIAL MAP

CONSTELLATIONS:

- ♏ Ophiuchus / Serpentarius
- ♌ Orion / Osiris
- ♋ Cetus (Sea-Monster)
- ♎ Via Combusta (The Burned Way)

ASTEROIDS & PLANETOIDS:

- ♄ Vulcan (circumsolar planet)
- ♅ Chiron (planetoid)
- ♁ Ceres (asteroid #1)
- ♁ Pallas (asteroid #2)
- ♁ Juno (asteroid #3)
- ♁ Vesta (asteroid #4)

HYPOTHETICAL PLANETS:

- ♄ Proserpina
- ♁ Isis (Transplutonia)
- ♁ Eris
- ♁ Sedna
- ♁ Nibiru (Rogue planet of Anunnaki)

LUNAR PHASES & ECLIPSES:

- ☾ Total Lunar Eclipse (Super Moon)
- ☉ Full Solar Eclipse
- ◯ First Full Moon in year
- ⊕ Rota Fortunæ (Wheel of Fortune)
- ☾ Lilith (Black Moon)
